**Invited  
lectures**

## LEC Sustainable Shipping Technologies Forum

# 3rd LEC Sustainable Shipping Technologies Forum

*Advancing the decarbonization of shipping!*

## Be part of the green revolution in shipping, network for an emission-free future!

The Large Engines Competence Center LEC together with Hamburg Port Authority invites you to the **3rd LEC Sustainable Shipping Technologies Forum** which will take place in the **historic Speicherstadt in Hamburg** as a hybrid event with free online access.

**The aim of the forum** is to foster the exchange of ideas, harness synergies, promote cooperation and **network the relevant actors** in the shipping sector for a zero-emission future.

**Join us for two days of inspiring discussions with internationally recognized**

## PROGRAM

- Key note and panel discussion with green shipping experts
- Technical sessions on main drivers of the decarbonization
- Exclusive networking event with port tour

## TOPICS

- Green ports & infrastructure
- Ship efficiency technologies
- Advanced propulsion and ship design
- On-board carbon capture and fuel reforming technologies

**experts in green shipping. The program will focus on the key drivers for the decarbonization of shipping and the IMO's 2050 emissions targets.** To strengthen the joint efforts of all stakeholders in addressing current and future sustainability challenges, the forum is organized as an annual series of events, alternating between Graz and Hamburg.

## REGISTRATION

**Registration** will be open soon at: [www.shippingforum.at](http://www.shippingforum.at).

Are you interested to contribute to the forum? Please contact us regarding **networking and sponsorship opportunities**.
